Paper 3 Business Decision-making

May/June 2026

### MARK SCHEME

Maximum Mark: 60

---

**Published**

This mark scheme contains the instructions and marking guidance that our examiners used to mark candidate responses for this component.

Before they start marking, examiners complete a standardisation process. They review a range of candidate responses and discuss the mark scheme in detail to agree which answers can and cannot be accepted. Examiners award marks where it is clear that candidate responses have met the requirements of the mark scheme. These requirements may vary between different components or different versions of the same component, depending on the exact requirements of the question and the candidate responses seen during the standardisation process.

Sometimes, our mark schemes may allow marks to be awarded to responses which contain elements that are factually incorrect or for content not covered by the syllabus. We do this in response to the demands of a specific question to support candidates and make sure that our assessments are fair. However, these allowances should not be used as a guide for teaching and learning.

We cannot discuss the mark scheme with schools, and we recommend that schools read the mark scheme together with the assessment material and the Principal Examiner Report for Teachers.

---

This document consists of **28** printed pages.

**General marking principles**

All examiners must apply these marking principles when marking candidate responses.

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Examiners must award marks for each response in line with: <ul style="list-style-type: none"> <li>the specific <b>content</b> defined in the mark scheme</li> <li>the specific <b>skills</b> defined in the mark scheme or in the level descriptions</li> <li>the <b>standard of response</b> required as exemplified by the standardisation scripts.</li> </ul>                                                                                                                                                                                                                                                                                    |
| 2 | Examiners must award <b>whole marks</b> (not half marks, or other fractions).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 3 | Examiners must award marks <b>positively</b> . This means that: <ul style="list-style-type: none"> <li>marks are not deducted for errors or omissions</li> <li>marks are awarded for correct/valid answers as defined in the mark scheme and also for <b>other valid answers</b> which go beyond the scope of the syllabus and mark scheme referring to your team leader as appropriate</li> <li>the quality of spelling, punctuation and grammar are judged <b>only</b> when the mark scheme indicates that these features are <b>specifically assessed</b> in the question. However, the meaning of all responses must be unambiguous.</li> </ul> |
| 4 | Examiners must <b>consistently</b> apply the requirements of the mark scheme and any rules for what to do when candidates have not followed instructions correctly.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 5 | Examiners must use the <b>full range of marks</b> defined in the mark scheme, unless limited by the quality of the candidate responses seen.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 6 | Examiners must award marks according to the mark scheme and <b>must not</b> award marks with grade thresholds or grade descriptions in mind.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Social Sciences-Specific Marking Principles (for point-based marking)

### 1 Components using point-based marking:

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. corrasion/corrosion)

### 2 Presentation of mark scheme:

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

**Annotations guidance for centres**

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

**Annotations**

| Annotation                                                                          | Meaning                                                                                                                      |
|-------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
|    | For objective points that are correct.                                                                                       |
|    | For objective points that are wrong.                                                                                         |
|    | When the candidate has attempted something, but the mark/skill has not been awarded as the answer is not sufficiently clear. |
|   | To highlight a point or section of an answer that justifies the mark/annotation.                                             |
|  | When the candidate has attempted something, and the mark/skill has been awarded.                                             |
|  | To show a page/section has been seen/read.                                                                                   |
|  | The repetition of a previous point in a response <b>or</b> the candidate is copying the case study/data.                     |
|  | The own figure rule applies – acts as a mark/tick.                                                                           |
|  | When AO1 has been awarded.<br>The number of Ks should match the mark awarded.                                                |

**PUBLISHED**

| Annotation     | Meaning                                                                         |
|----------------|---------------------------------------------------------------------------------|
| <b>APP</b>     | When AO2 has been awarded.<br>The number of APPs should match the mark awarded. |
| <b>AN</b>      | When AO3 at Level 1 has been awarded.                                           |
| <b>L2 AN</b>   | When AO3 at Level 2 has been awarded.                                           |
| <b>EVAL</b>    | When AO4 at Level 1 has been awarded.                                           |
| <b>L2 EVAL</b> | When AO4 at Level 2 has been awarded.                                           |
| <b>L2</b>      | When AO3 or AO4 has been awarded at Level 2.                                    |
| <b>L3</b>      | When AO4 has been awarded at Level 3.                                           |

**Guidance on using levels-based marking**

Marking of work should be positive, rewarding achievement where possible, but clearly differentiating across the whole range of marks, where appropriate.

The examiner should look at the work and then make a judgement about which level statement is the best fit. In practice, work does not always match one level statement precisely so a judgement may need to be made between two or more level statements.

Once a best-fit level statement has been identified, use the following guidance to decide on a specific mark:

- If the candidate's work **convincingly** meets the level statement, award the highest mark.
- If the candidate's work **adequately** meets the level statement, award the most appropriate mark in the middle of the range.
- If the candidate's work **just** meets the level statement, award the lowest mark.
- For AO3 and AO4 L2 and L3 must be clearly annotated on the response at the point where the level is achieved.

**Assessment objectives****AO1 Knowledge and understanding**

Demonstrate knowledge and understanding of business concepts, terms and theories.

**AO2 Application**

Apply knowledge and understanding of business concepts, terms and theories to problems and issues in a variety of familiar and unfamiliar business situations and contexts.

**AO3 Analysis**

Analyse business problems, issues and situations by:

- using appropriate methods and techniques to make sense of qualitative and quantitative business information
- searching for causes, impact and consequences
- distinguishing between factual evidence and opinion or value judgement
- drawing valid inferences and making valid generalisations.

**AO4 Evaluation**

Evaluate evidence in order to make reasoned judgements, present substantiated conclusions and, where appropriate, make recommendations for action and implementation.

| Question | Answer                                                                                                   |                                                                                                                                                                                                                            |                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                     | Marks |

| 3(c)     | <p><b>AO4 Evaluation</b></p> <p><i>Limited evaluation</i> <span style="border: 1px solid red; padding: 0 2px;">EVAL</span> – limited supported judgement and/or a weak attempt at evaluative comment.</p> <p><i>Developed evaluation</i> <span style="border: 1px solid red; padding: 0 2px;">L2</span> <span style="border: 1px solid red; padding: 0 2px;">EVAL</span> – supported judgement and/or reasonable evaluative comment.</p> <p><i>Developed evaluation in context</i> <span style="border: 1px solid red; padding: 0 2px;">L3</span> <span style="border: 1px solid red; padding: 0 2px;">EVAL</span> – supported judgement in context and/or reasonable evaluative comment in context.</p> <ul style="list-style-type: none"> <li>• However statements after analysis showing an alternative view of the point being explained</li> <li>• 1 EVAL for an answer showing an undeveloped but balanced view.</li> <li>• A justified judgement whether (or not), CC should delay its organisational structure.</li> <li>• What the judgement might depend upon, such as; objectives of the firm, changes in external influences, the actions of competitors, the skill of the remaining employees etc.</li> <li>• The extent to which layering may be suitable for CC.</li> <li>• Different perspectives over whether CC should delay its organisational structure, including; <ul style="list-style-type: none"> <li>Shareholders – may only be interested in the short-term and therefore may benefit from cost savings of layering and less concerned about the long-term impacts on decision making and revenue.</li> <li>Customers – unlikely to encounter this issue, except when something goes wrong ('may I speak to the manager').</li> <li>If there are no managers available, will the directors be willing to take over this customer facing role?</li> </ul> </li> </ul> <p>Accept all valid responses.</p> <p>Evaluation L3 example</p> <p>Olivia and her board of directors must carefully consider all potential impacts before deciding to delay CC. The finance director's suggestion may be aimed at cost cutting and facilitating investment in ERP software, but the sales managers and ERP play very different business roles. ERP will be able to take over some of the administration and resource planning work but not the customer interaction, that is so important in a retail car business. The loss of the sales managers may lead to customer dissatisfaction and less sales of cars, due to less personal service. However, if the sales teams have the experience and skills needed they may be able to take on some of the responsibilities. There is also the increased responsibility on other directors to be considered, as well as the overall objectives of CC. If the vision is to downsize human resources and upsize reliance on technology then the layering decision may be a first step.</p> |       |

| 4(b)     | <p><b>AO4 Evaluation</b></p> <p><i>Limited evaluation</i> <b>EVAL</b> – limited supported judgement and/or a weak attempt at evaluative comment.</p> <p><i>Developed evaluation</i> <b>L2 EVAL</b> – supported judgement and/or reasonable evaluative comment.</p> <p><i>Developed evaluation in context</i> <b>L3 EVAL</b> – supported judgement in context and/or reasonable evaluative comment in context.</p> <ul style="list-style-type: none"> <li>• However statements after analysis showing an alternative view of the point being explained</li> <li>• 1 EVAL for an answer showing an undeveloped but balanced view.</li> <li>• A justified judgement of the need/importance for CC of forecasting sales.</li> <li>• What the judgement might depend upon, such as; objectives of the firm, changes in external influences, the actions of competitors, the skill of the employee etc.</li> <li>• Markets are dynamic and unpredictable, therefore, to be useful sales forecasts need to be revised frequently to take account of the changing external environment.</li> </ul> <p>Accept all valid responses.</p> <p>Evaluation L3 example</p> <p>Sales forecasting is very important in all retail businesses, especially those that face seasonal demand and frequent update of car models, such as CC. Forecasting using past sales figures and keeping in mind external influences, such as trends in incomes/GDP will help CC to plan resources and have enough inventory, and range of vehicles to meet demand effectively. However, in this case, the new showroom is a recent move and most past sales data will relate to the previous location, so may not be completely relevant. Customer needs in this dynamic market for cars also change quickly, so there will be a need to continually update forecasts in order to be useful. Market research will be as important to keep in touch with the latest trend in car sales, such as an increase in demand for electric cars.</p> |       |

| Question | Answer                                                                                |                                                                                                                       |                                                                                              |                                                                                                                      | Marks                                                                                                                                                                                                                                                                           |

| 5        | <p><b>AO4 Evaluation</b></p> <p><i>Limited evaluation</i> <b>1</b> <small>EVAL</small> – limited supported judgement and/or a weak attempt at evaluative comment or focus of judgement is only on the impact of economic factors on CC.</p> <p><i>Developed evaluation</i> <b>2</b> <small>EVAL</small> – supported judgement and/or reasonable evaluative comment linking economic factors to impact on decisions.</p> <p><i>Developed evaluation in context</i> <b>3</b> <small>EVAL</small> – supported judgement in context and/or reasonable evaluative comment in context linking economic factors to impact on decisions.</p> <p><b>Note</b><br/>To achieve L2/L3 EVAL marks the candidate must show judgement / balanced argument of the likely impact of economic factors on CC decision making.</p> <ul style="list-style-type: none"> <li>• However statements after analysis showing an alternative view of the point being explained</li> <li>• 1 EVAL for an answer showing an undeveloped but balanced view.</li> <li>• The extent to which economic factors may have an overall positive or negative effect on CC (L1 EVAL).</li> <li>• A justified judgement of the likely impact of economic factors on CC decision making.</li> <li>• What the judgement might depend upon, such as; objectives of the firm, changes in other external influences, the actions of competitors, the skill of the directors, accuracy of sales forecasts, price elasticity of demand, income elasticity of demand etc.</li> </ul> <p>Accept all valid responses.</p> <p>Evaluation L3 example</p> <p>Economic factors will impact all decisions made by CC. A profit driven retail business needs to keep up with macro-economic trends such as inflation and economic growth. There are also government policies to consider. If economic trends are negative for real incomes, then some consumers may 'trade down' to cheaper car models. However, demand at the top end for very luxurious car models may be 'inflation proof' to some extent as very high income will still buy. However, there are also other external factors that are as important, such as government policies towards the change to electric vehicles. If subsidies are offered to consumers, then more will switch away from petrol models. Therefore, CCs decisions will be impacted by a wide range of external factors, not only those related to economic changes.</p> |       |
